

STATE OF CALIFORNIA  
STATE WATER RESOURCES CONTROL BOARD  
**DIVISION OF WATER RIGHTS**

**ORDER**

APPLICATION 24929

PERMIT 19515

LICENSE \_\_\_\_\_

**ORDER APPROVING A NEW DEVELOPMENT SCHEDULE**

**WHEREAS:**

1. Permit 19515 was issued to Citizens Utilities Company of California on June 14, 1985 pursuant to Application 24929.
2. Permit 19515 was subsequently assigned to Sweetwater Springs Water District.
3. A petition for an extension of time within which to develop the project and apply the water to the proposed use has been filed with the State Water Resources Control Board.
4. The permittee has proceeded with diligence and good cause has been shown for said extension of time.

**NOW, THEREFORE, IT IS ORDERED THAT:**

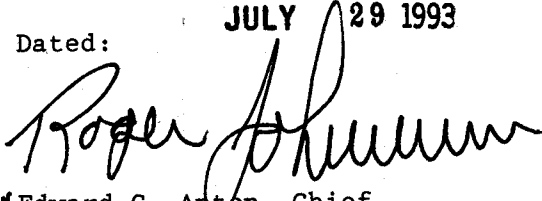

1. Condition 7 of the permit be amended to read:

COMPLETE APPLICATION OF THE  
WATER TO THE PROPOSED USE  
SHALL BE MADE ON OR BEFORE

December 31, 2002

(0000009)

Dated: JULY 29 1993

Division of Water Rights

STATE OF CALIFORNIA

STATE WATER RESOURCES CONTROL BOARD  
DIVISION OF WATER RIGHTS

PERMIT FOR DIVERSION AND USE OF WATER

PERMIT 19515

4/10/92 Not of asgd: Per#19515 App#24929  
Sweetwater Springs Water District

Application 24929 of Citizens Utilities Company of California  
P. O. Box 15468, Sacramento, CA 95813

filed on November 17, 1975, has been approved by the State Water Resources Control Board SUBJECT TO VESTED RIGHTS and to the limitations and conditions of this Permit.

Permittee is hereby authorized to divert and use water as follows:

1. Source:	Tributary to:
Russian River Underflow (10 points)	Pacific Ocean
Hulbert Creek Underflow (1 point)	Russian River thence
	Pacific Ocean

2. Location of point of diversion:	40-acre subdivision of public land survey or projection thereof	Section	Township	Range	Base and Meridian
SEE ATTACHED ADDENDUM					

County of Sonoma

3. Purpose of use:	4. Place of use:	Section	Township	Range	Base and Meridian	Acres
Municipal	Permittee's Guerneville Service area located within:					
	Sections 25 and 36		8N	11W	MD	
	Section 20, 21, 28, 29 30, 31 and 32		8N	10W	MD	
	Sections 1, 11 and 12		7N	11W	MD	
	Sections 5, 6, 7, 17 and 18		7N	10W	MD	

The place of use is shown on map filed with the State Water Resources Control Board.

## ADDENDUM

[illegible]

5. The water appropriated shall be limited to the quantity which can be beneficially used and shall not exceed 3.0 cubic feet per second to be diverted from January 1 to December 31 of each year. The maximum amount diverted under this permit shall not exceed 1,249 acre-feet per year. (0000005)

6. The amount authorized for appropriation may be reduced in the license if investigation warrants. (0000006)

7. Complete application of the water to the authorized use shall be made by December 1, 1990. (0000009)

8. Progress reports shall be submitted promptly by permittee when requested by the State Water Resources Control Board until license is issued. (0000010)

9. Permittee shall allow representatives of the State Water Resources Control Board and other parties as may be authorized from time to time by said Board, reasonable access to project works to determine compliance with the terms of this permit. (0000011)

10. Pursuant to California Water Code Sections 100 and 275, and the common law public trust doctrine, all rights and privileges under this permit and under any license issued pursuant thereto, including method of diversion, method of use, and quantity of water diverted, are subject to the continuing authority of the State Water Resources Control Board in accordance with law and in the interest of the public welfare to protect public trust uses and to prevent waste, unreasonable use, unreasonable method of use or unreasonable method of diversion of said water.

The continuing authority of the Board may be exercised by imposing specific requirements over and above those contained in this permit with a view to eliminating waste of water and to meeting the reasonable water requirements of permittee without unreasonable draft on the source. Permittee may be required to implement a water conservation plan, features of which may include but not necessarily be limited to: (1) reusing or reclaiming the water allocated; (2) using water reclaimed by another entity instead of all or part of the water allocated; (3) restricting diversions so as to eliminate agricultural tailwater or to reduce return flow; (4) suppressing evaporation losses from water surfaces; (5) controlling phreatophytic growth; and (6) installing, maintaining, and operating efficient water measuring devices to assure compliance with the quantity limitations of this permit and to determine accurately water use as against reasonable water requirements for the authorized project. No action will be taken pursuant to this paragraph unless the Board determines, after notice to affected parties and opportunity for hearing, that such specific requirements are physically and financially feasible and are appropriate to the particular situation. The continuing authority of the Board also may be exercised by imposing further limitations on the diversion and use of water by the permittee in order to protect public trust uses. No action will be taken pursuant to this paragraph unless the Board determines, after notice to affected parties and opportunity for hearing, that such action is consistent with California Constitution Article X, Section 2; is consistent with the public interest and is necessary to preserve or restore the uses protected by the public trust. (0000012)

11. The quantity of water diverted under this permit and under any license issued pursuant thereto is subject to modification by the State Water Resources Control Board if, after notice to the permittee and an opportunity for hearing, the Board finds that such modification is necessary to meet water quality objectives in water quality control plans which have been or hereafter may be established or modified pursuant to Division 7 of the Water Code. No action will be taken pursuant to this paragraph unless the Board finds that (1) adequate waste discharge requirements have been prescribed and are in effect with respect to all waste discharges which have any substantial effect upon water quality in the area involved, and (2) the water quality objectives cannot be achieved solely through the control of waste discharges. (0000013)

12. The water appropriated from Hulbert Creek underflow shall be limited to the quantity which can be beneficially used and shall not exceed 12,000 gallons per day to be diverted from January 1 to December 31 of each year. The maximum amount diverted under this permit from Hulbert Creek shall not exceed 12 acre-feet per year. The equivalent of the daily allowance for any 7-day period may be diverted in a shorter time, except during the months of May and June, provided there be no interference with other vested rights.

Measurement of the diversion from Hulbert Creek shall be made either by meter or by keeping and making available the power consumption records from which the daily and monthly pumping amounts can be calculated. (0000999)

13. The total quantity of water diverted from the Hulbert Creek watershed under this permit, together with any other rights claimed by permittee, including rights pursuant to permittee's Statements of Water Diversion and Use, S9076, S9077, and S9079, shall not exceed 130 gallons per minute during the months of May and June of each year. (0000114)

14. For the protection and preservation of fishlife and the maintenance of water related recreational uses, permittee shall divert only when the flow in the Russian River exceeds 125 cubic feet per second or such lesser flows as are required by the Board. River flows shall be measured at the nearest U. S. Geological Survey gaging station on the river. (0140068)

15. Availability of water for appropriation under this permit during the critical period of July 1 through October 31 is dependent upon water remaining available under the 10,000 acre-foot per annum allocation of water from Coyote Valley Reservoir (Lake Mendocino) for use in the Russian River Valley in Sonoma County. If subsequent studies show that the above-mentioned allocation has been fully used before use is completed under this permit, a license shall be issued only for the amount of water, if any, which has been put to use under this permit and which is included in the allocation. (0000081)

16. Permittee shall, not later than December 31, 1985, prepare and adopt an Urban Water Management Plan in conformance with Sections 10610 et. seq. of the California Water Code. The plan shall be submitted to the Board no later than 30 days after adoption. Additional information as may be required by the Board shall be submitted at the same time.

All cost-effective measures identified in the water conservation program shall be implemented in accordance with the schedule for implementation. (0000029)

**This permit is issued and permittee takes it subject to the following provisions of the Water Code:**

Section 1390. A permit shall be effective for such time as the water actually appropriated under it is used for a useful and beneficial purpose in conformity with this division (of the Water Code), but no longer.

Section 1391. Every permit shall include the enumeration of conditions therein which in substance shall include all of the provisions of this article and the statement that any appropriator of water to whom a permit is issued takes it subject to the conditions therein expressed.

Section 1392. Every permittee, if he accepts a permit, does so under the conditions precedent that no value whatsoever in excess of the actual amount paid to the State therefor shall at any time be assigned to or claimed for any permit granted or issued under the provisions of this division (of the Water Code), or for any rights granted or acquired under the provisions of this division (of the Water Code), in respect to the regulation by any competent public authority of the services or the price of the services to be rendered by any permittee or by the holder of any rights granted or acquired under the provisions of this division (of the Water Code) or in respect to any valuation for purposes of sale to or purchase, whether through condemnation proceedings or otherwise, by the State or any city, city and county, municipal water district, irrigation district, lighting district, or any political subdivision of the State, of the rights and property of any permittee, or the possessor of any rights granted, issued, or acquired under the provisions of this division (of the Water Code).
